

MultiSlicer, multifunctional vegetable slicer with an ergonomic non-slip holder and 3 different blades

Assemble the blade

Crefully put the desired blade inside the handle and safely tuck it in with the help of side pin on the blade.

Corrugated flakes blade

Can cut potato chips, radish slices or cabbage into 2 mm thin slices in the fastest way possible!

Thick wire blade

Can cut potato or cucumber shreds into 3 mm thick wire pieces in no time!

Fillament blade

Can cut shredded radish or carrot into 2 mm fillaments for a smooth taste!

Specifications

Material: stainless steel

Dimensions: 30x7 cm

Use: While using this slicer, push the food downward towards the blades rather than pulling towards you because it is 6x faster. Before cutting long vegetables such as cucumber and carrot, cut them in shorter lengths before slicing. If you have one, use a safety guard for your fingers.

Cleaning: Just remove the blades and wash them under the running water with a cleaning brush. We suggest using a cleaning brush to properly remove residue left on the cutter.

Warning

The blades are incredibly sharp, so please be careful whilst using the slicer. We advice using a safety guard for your fingers.

If you are slicing something small, hold it with your fingers far away from the blades or put your vegetable/fruit on the safety guard.

The MultiSlicer is not suitable to cut meat.

Children are prohibited from using the product. Please keep the slicer out of the reach of children.

Supplier: Yiwu Ohico, Tianxin 4th Village, Fotang Town, China. Importer: Maneks plus d.o.o. Volčji Potk 38, 1235 Radomlje, Slovenia.
